Job Application Form

Aim

To design and develop a Job Application Form using Zoho Creator by creating a structured form, applying appropriate validations, and generating a report for managing job applications.

Theory

Data modelling and form design involve organizing data into suitable fields and sections for efficient collection and management. In Zoho Creator, forms can be created using different field types such as Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox.

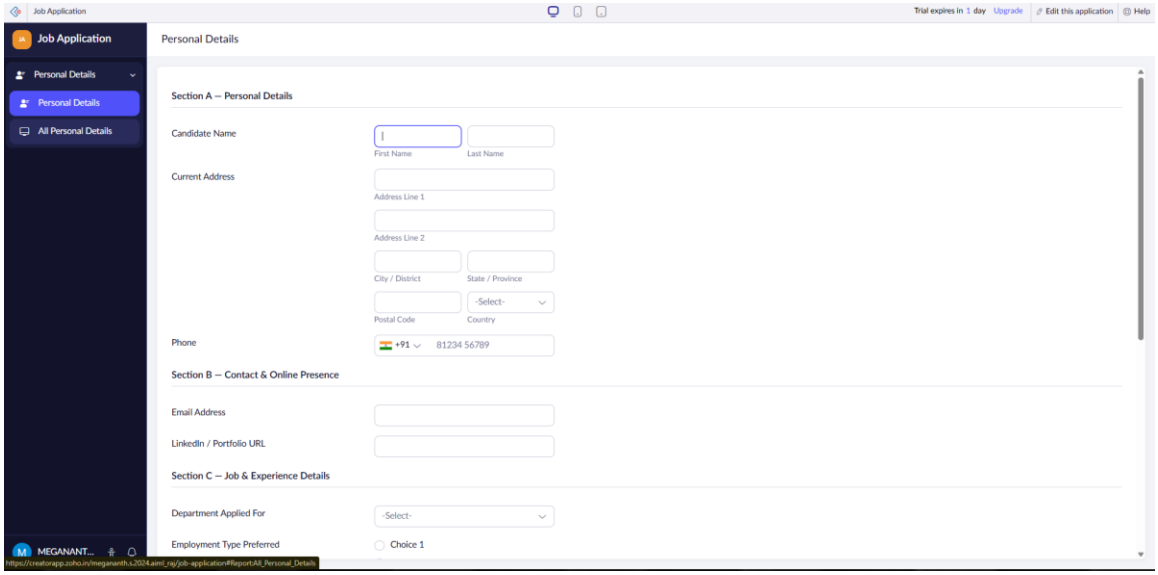

In this experiment, a Job_Application_Form is designed to collect applicant personal details, contact information, educational qualifications, technical skills, work experience, job preferences, and declaration details. The form is divided into four sections: Personal Details, Contact Details, Education & Skills, and Job Details & Declaration.

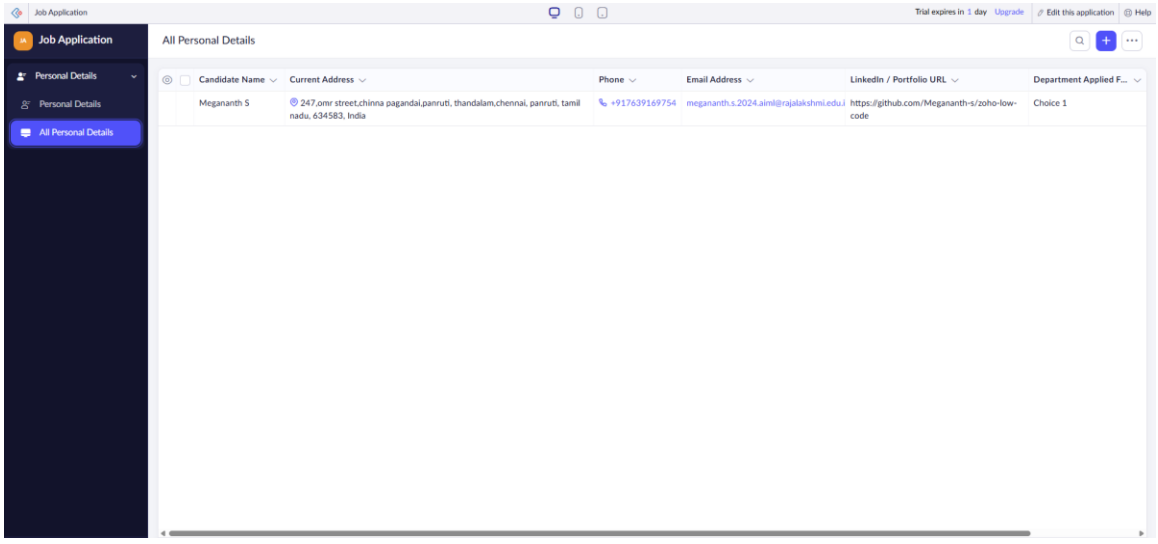

Validations are applied to ensure accurate data entry, including mandatory fields, valid email and phone formats, appropriate age, required educational qualification, and compulsory declaration. The submitted data is displayed in the Job_Application_Report for reviewing and shortlisting candidates.

Procedure

1. Open Zoho Creator and create the Job Application Management application.
2. Create the Job_Application_Form.
3. Add the required fields for applicant, contact, education, skills, experience, job preference, and declaration details.
4. Organize the fields into the four specified sections.
5. Configure mandatory fields and apply the required validation rules.
6. Save and preview the form.
7. Enter sample applicant details and submit the form.
8. Create the Job_Application_Report and verify the submitted records.
9. Filter the records based on job role, qualification, skills, and experience for shortlisting.

Result

The Job Application Form was successfully created in Zoho Creator with a structured data model, appropriate field validations, and organized sections. The submitted job applications were successfully stored and displayed in the Job_Application_Report for effective review and candidate shortlisting.
